

BADBIR Newsletter May 2013

Congratulations to the teams at Salford Royal and West Middlesex University Hospital who were jointly the highest recruiters to BADBIR during April 2013. Thanks also to Belfast City Hospital who registered the most patients in the conventional cohort.

Changes to the Inflammatory Arthritis Question

Currently on BADBIR we collect information on whether each participant has a diagnosis of inflammatory arthritis. This is changing to focus mainly on psoriatic arthritis:

Current Baseline Question

"Does the patient have diagnosis by a rheumatologist of inflammatory arthritis?"

Revised Baseline Question

"Does the patient have diagnosis of psoriatic arthritis?"

Please note that any other inflammatory arthritic conditions can still be captured at baseline. These can be entered in the comorbidity section

....

Current Follow-up Question

"Has the patient been diagnosed with inflammatory arthritis by a rheumatologist?"

Revised Follow-up Question

"Does the patient have diagnosis of psoriatic arthritis?"

Please note that any new diagnoses of other inflammatory arthritic conditions can be entered at follow-up in the Adverse Events section. If at baseline the psoriatic arthritis question is answered as 'Yes', we would expect to see this question entered as 'Yes' at each subsequent follow-up

The change will be enacted from 01/06/2013 on the database. The questionnaires on the website will also be changed prior to this date.

We will have a requirement to query the records of existing BADBIR patients where it has been confirmed that they have a diagnosis of inflammatory arthritis. We will be asking if this is specifically a diagnosis of psoriatic arthritis. This will be within the BADBIR database as part of the data query system. Thank you for your help with collecting this data.

March's Top Recruiters

Thanks to **St John's Institute of Dermatology** at **Guy's & St. Thomas' Trust** who were the highest overall recruiter to BADBIR during March 2013. Thanks also to **Nottingham**, **Newcastle**, **Ipswich & Dublin St. Vincent's** who share the title of highest conventional recruiter for the month.

2013 Top Recruiters

Based on total patients registered to BADBIR in the year so far

County Durham & Darlington NHS FoundationTrust

Royal Liverpool & Broadgreen Hospitals NHS Trust

Belfast Health & Social Care Trust

University Hospitals of North Staffordshire

Bradford Teaching Hospitals NHS Trust

NHS Lothian (Edinburgh)

West Middlesex University NHS Trust

Nottingham University Hospitals NHS Trust

New Recruiters

Over the last 2 months we have welcomed 6 new recruiting centres to BADBIR:

- Western Sussex Hospitals NHS Trust
- Barking, Havering and Redbridge NHS Trust
- North West London Hospitals Trust
- Scarborough & North East Yorkshire NHS Trust
- University Hospital Lewisham NHS Trust
- South Infirmary Victoria Hospital (Cork)

Thanks to all our new recruiters

BADBIR Centre Profile

To celebrate their recent achievement of passing the landmark of 100 BADBIR registrations, a centre profile of **University Hospital of North Staffordshire** has been prepared. UHNS have achieved this total in just 16 months following the first recruited patient in September 2011.

The University Hospital of North Staffordshire (UHNS) is a **teaching hospital** in partnership with Keele University. The dermatology team at this centre consists of a clinical team of three consultants, five staff nurses and a clinical support worker. There are also two research nurses helping with dermatology studies.

One of the consultants Dr Sanda Popescu runs a Drug Monitoring Clinic twice a week, where 130 patients on systemic treatments (80-90% psoriasis) are reviewed. She sees approximately 20 biologic patients and 60 conventional patients per month alongside her colleague that sees 100 conventional patients per month. There is also a nurse-led Methotrexate Clinic which runs in parallel with the Drug Monitoring Clinic.

In 2012 an average of 6,6 registrations were made at North Staffs each month

Indentifying Eligible Patients...

Recruitment of patients onto the BADBIR at this centre is an **integral part** of practice, particularly in the Drug Monitoring Clinic from which 90% of BADBIR participants are identified. **Pre-screening** takes place one week before each clinic to identify any potentially eligible patients. This includes looking at past GP letters and sometimes through patient notes.

On all Registrations
& Follow-Ups from
North Staffs in 2012
99% had a complete
& valid PASI entered

Potentially eligible patients are highlighted and a list is also made of those who are failing current therapies in case they change treatment.

Patients are approached before or after clinic appointments and invited to participate in the study. Eligibility is checked and confirmed once assessments have been performed and consent is taken either there and then or at the next follow up visit.

Routine Collection of PASI & DLQI...

Another key factor contributing to the success of UHNS in recruiting patients to the Conventional Cohort is the team's commitment to collecting PASI & DLQI. The doctors undertake a PASI assessment on all new patients with psoriasis. In addition, PASI forms part of the regular assessment of those patients managed on either conventional or biologic therapy. This practice is at the heart of the success at this centre in recruitment to the conventional cohort as the lack of a recorded PASI in the hospital case notes makes it impossible to identify patients who met this criteria pre treatment and is one of the main reasons given at other centres why patients are not eligible for inclusion.

Key Points to North Staffs Success

- Departmental commitment to taking PASI & DLQI aids conventional recruitment
- Patients are approached to take part in BADBIR both before and after clinics
- Meetings are held in the dermatology department to discuss progress and remind all staff about the study

Managing BADBIR Follow-ups...

All follow ups are booked into the Drug Monitoring Clinic to ensure the BADBIR data is collected. Drug monitoring Clinic lists are screened in advance to identify any patients due BADBIR follow up. Questionnaires are given to patients on their arrival and the rest of the follow up is completed during the clinic visit. UHNS aim to ensure one of the research nurses is available for these patients.

The Importance of Communication...

Communication has been key to UHNS's success with efforts made to involve all clinical staff in the study where possible. The research nurses have built effective relationships to help promote BADBIR. Close communication between Dr Popescu and the research team is paramount and good working relationships have been formed as a result. UHNS has streamlined the study procedures to minimise intrusion into clinical time which has also aided promotion of BADBIR internally.
