

# October 2015 Summary of Changes to BADBIR

#### Study Amendment 8 is Now Approved

If you have any queries on any aspect of these changes then please contact the BADBIR office (badbir@manchester.ac.uk / 0161 306 1896)

Thanks to all centres for their ongoing contribution to BADBIR

#### **New Protocol Approved**

The ethics committee have now approved study amendment 8 which introduces **Protocol v15 01/07/2015**. This supersedes the previous version 14. We have notified your R&D department, once we receive trust approval we will provide you with the relevant documents and instructions on where to file these in your site file.

## Removing the minimum age limit

We now have approval to include psoriasis patients who are **under the age of 16** who are being treated with a biologic or conventional therapy.

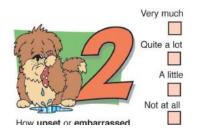

Despite the small number of children being treated with biologic or conventional therapy, it remains important that the long term safety is evaluated in this group. The combination of exposure to immunosuppressive therapy on an immature immune system and a potentially high lifetime exposure, may place them at a higher risk than adults.

#### **Procedure:**

- ◆The parent/guardian will be provided with adult version of the current BADBIR Patient Information sheet (Version 4, dated 14/05/2009)
- ◆ An age appropriate version of BADBIR information sheet will be provided and discussed with the child participant.
- ♦ We will require both the **Patient Assent Form** (version 4, 14/05/2009) signed by the child participant and the **Consent form for Parent or Guardian** (Version 4 14/05/2009) for patient registration.
- ◆The following Patient Reported Outcome Measures will be substituted for the adult versions at each assessment:
- \* Children's Dermatology Life Quality Index (CDLQI)
- \* EQ 5D-Y
- \* Child Health Assessment Questionnaire (CHAQ)

2

#### Extension of study end

The study end date for the BADBIR was to be 31/07/2018. This has now been extended for a further 10 years to 31/07/2028. The reason for the extension is there are plans to include some of the new biologic and small molecules therapies which have recently become available for the treatment of psoriasis.

4

### **Increasing size of Conventional Cohort**

The target of 4000 registrations for the conventional comparison group has now increased to an overall maximum of 7000.

The reason for this increase is the anticipation of the inclusion of the new biologic therapies and the desire to have a contemporaneous comparator cohort of patients, as this is likely to be more representative of current prescribing patterns. In addition, it has been noted that there is attrition from the conventional cohort over time with patients moving to the biologic cohort.

5

## Minor revision to questionnaires

Minor revisions have been made to guide better data collection. The revisions clarify the type of information required opposed to collecting more information with the exception of the "batch number" of the medication which is being added to comply with European Medicines Agency regulations.

6

### **Biologic Drug Trade Names**

BADBIR will now use the trade name of the biologic drugs instead of their originator names. All existing information will automatically change. List of drugs from this change is as follows:

Originator Name Adalimumab Etanercept Ustekinumab

Infliximab

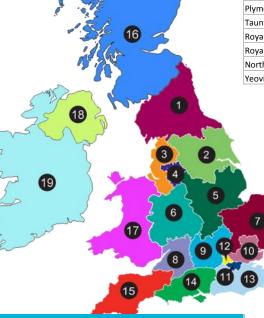

Trade Name Humira Enbrel Stelara Remicade
